**UK Access Management Federation for Education and Research**

Welcome to the home of the UK Access Management Federation for Education and Research. Supported by JISC and Becta, and operated by JANET(UK), the federation provides a single solution to access online resources and services for education and research.

**Benefits:** Organisations interested in joining the federation should consider the many **benefits** it has to offer. They may wish to join as an Identity Provider (IdP) (eg. a university or local authority), or as a Service Provider (SP), (eg. a publisher or content provider). In some cases, organisations may wish to join as both.

**Shibboleth:** The federation uses the standards-based **Shibboleth** software, developed by the Internet2 community in the United States. Shibboleth defines a common framework for access management that is being adopted by education and commercial sectors across the world. Click [here](#) for more information on how it works.

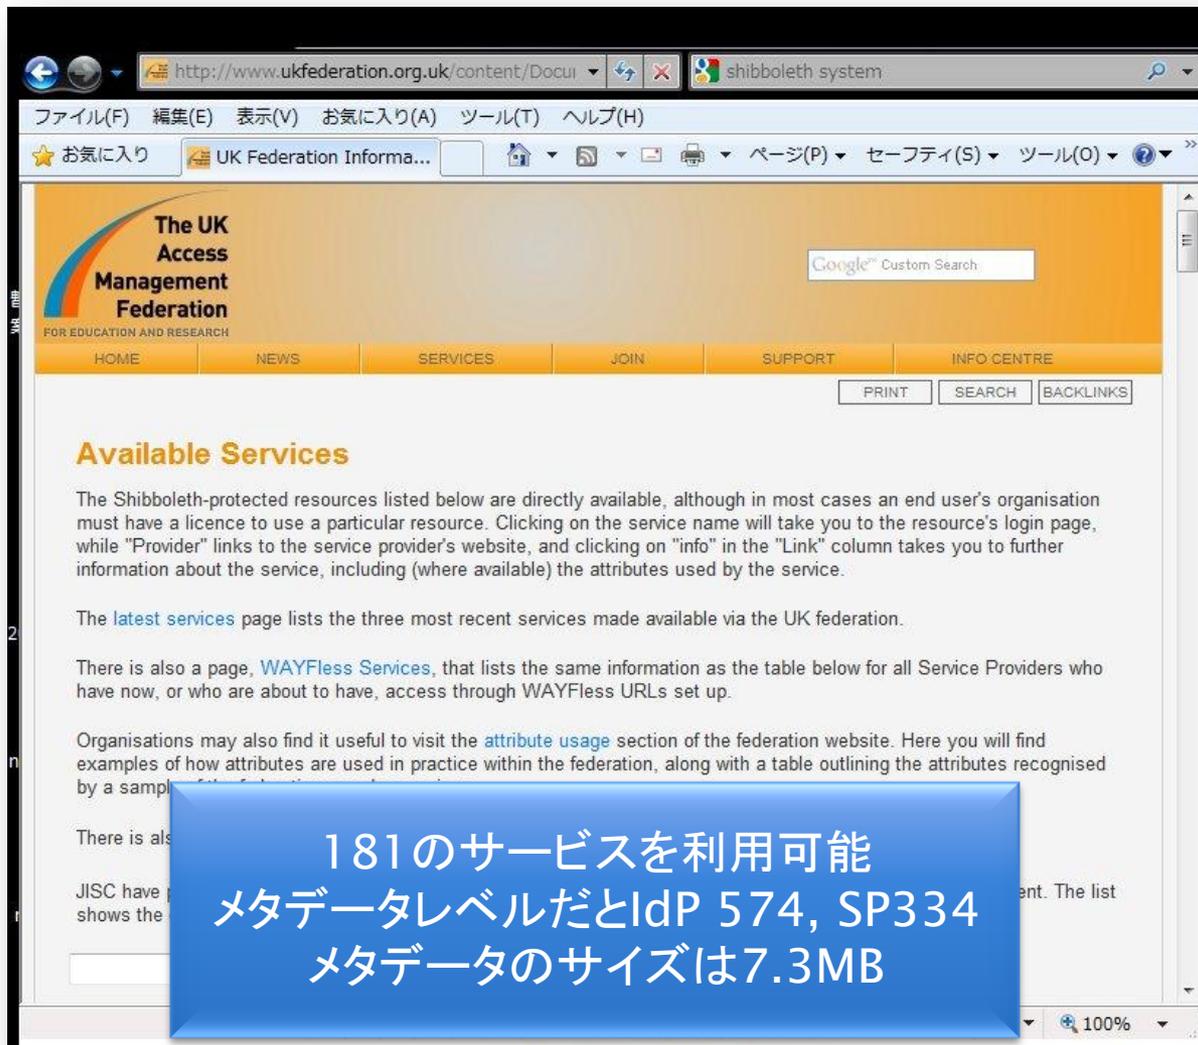

**Eligible organisations** were invited to join the federation from 30 November 2006. Here is the [current list of members](#).
