### Aims and Scope

The overall aim of *Applied Signal Processing* is to publish papers on applications of signal processing in various areas and applications of new and emerging technologies to signal processing. It is directed as much at the practising engineer as at the academic.

*Applied Signal Processing* will highlight the similarities in approach to signal processing in diverse application areas and encourage a cross-fertilization of techniques. It will not favour digital processing over analog, emphasising the renewed worldwide interest in analog signal processing techniques.

There will be three types of paper: Original Articles, Letters and Laboratory Notes. All papers should attempt to bring theory to life with practical examples. Tutorial articles on current signal processing-related topics of interest are welcomed. Letters will have speedy turnaround and Laboratory Notes will be more experimental and differentiated from Original Articles by being more tutorial in style. Contributions from Research Centres describing their activities and expertise are also invited. Other editorial material in the Journal includes an editorial, conference notes and book reviews. Please note that papers emphasise the practical aspects of the work described.

Subject areas include, but are by no means limited to: • Applications of Signal Processing • Dedicated Signal Processing Architectures • Performance Analysis of Architectures and Algorithms • Neural Networks in Signal Processing • Non-Linear Signal Processing and Systems • Processing Elements • Optical and Gallium Arsenide Signal Processing • Smart Sensors and Data Converters • Filter Structures & Filter Design • Applications of Fuzzy Logic • Implementation Strategies and Limitations • Design Tools and Educational Issues.

Application areas include: • Speech Processing, Coding, Understanding and Synthesis • Computer Vision, Image Processing and Pattern Recognition • Signal Processing in Communications • Remote Sensing • Oceanography • Medical Imaging and other Medical Applications • Music, Audio • Applications of Chaos Theory and Fractals • Ultrasonics • Fibre Optic Sensing/Transducers • SAR, Radar, Sonar • Economic Time Series Analysis • Seismography Instrumentation, Industrial Automation, Avionics, Transport, Simulation and Cryptography.

### Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all co-authors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g. as offprints) as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

*Special regulations for photocopies in the USA:* Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of US Copyright Law, provided a fee is paid. This fee is US\$ 0.20 per page per copy, plus a basic fee of US\$ 2.00 per article. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN number, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

*Other regulations:* Authors publishing in this journal can, under certain conditions, benefit from library and photocopy fees collected by VG WORT. Authors of German nationality and citizens of Austria, Switzerland and member countries of the European Community, may apply to VG WORT, Abteilung Wissenschaft, Goethestrasse 49, D-80336 München 2, for detailed information.

*Change of address:* Allow six weeks for all changes to become effective. All communications should include both old and new addresses (with postal codes) and should be accompanied by a mailing label from a recent issue.

*Microform:* Microform editions are available from: University Microfilms International, 300 N. Zeeb Road, Ann Arbor, MI 48106, USA

### Subscription Information

Volume 1 (4 issues) will appear in 1994. The subscription rate is £120.00 plus postage. Orders can be placed with your subscription agent or sent directly to:

Springer-Verlag London Limited  
Sweetapple House  
Catteshall Road  
Godalming  
Surrey GU7 3DJ, UK  
Tel: (0)483 418822  
Fax: (0)483 415151 or

Springer-Verlag GmbH & Co KG  
Heidelberger Platz 3  
D-14197 Berlin  
Germany  
Tel: (0)30/8207-1  
Fax: (0)30 8214091 or

Springer-Verlag New York Inc
